Solutions for Power

STANDARD & CUSTOM ELECTRICAL DISTRIBUTION PRODUCTS

American Midwest Power

Solutions for Power

AMP is committed to providing our customers with quality, cost-effective products utilizing innovative designs and creative engineering - delivered on-time and within budget.

AMP is the premier manufacturer of standard & custom electrical distribution products, committed to finding you *Solutions For Power*.

ABOUT US

American Midwest Power (AMP) has been manufacturing quality power distribution equipment for the residential, commercial, industrial and institutional markets. AMP gear can be found in all 50 states and many countries throughout the world.

Your Solution For Power

Electrical consulting engineers, supply houses and contractors have been requesting affordable, high-quality AMP products since 1975. From lightweight busways to custom-engineered switchboards our commitment to quality includes:

- Easy-to-install equipment
- Expert engineering assistance
- Custom build services

We work directly with electric utilities to ensure that all our equipment is current and compliant. Our standard product designs meet most utility requirements in the markets where we conduct business. Please visit our website at ampmfg.com or contact us for further information.

DESIGNING PRODUCTS WITH INDUSTRY STANDARDS

Your best interests are at the heart of our equipment manufacturing. That's why we design products according to third-party codes and standards like these. Visit ampmfg.com to see how each product meets industry-standards for safety and reliability.

UL LISTED

Qualified AMP equipment has successfully met stringent standards for product safety in commercial and industrial applications.

ETL LISTED

Qualified AMP equipment has successfully met stringent standards for product safety in commercial and industrial applications.

NEMA

Products that meet NEMA codes display sound technical standards and improved product safety. You and your AMP representatives can use NEMA guidelines to help select the right products for your job.

NEC

Whether designing new products or making product recommendations, AMP adheres to the code standards set forth by the National Electric Code.

STANDARD PRODUCTS

CURRENT TRANSFORMER CABINETS

Utility specific approved. Most compact and feature driven product line offering in the market.

DISCONNECTS

U/L listed and labeled UL98 complete line of service entrance rated switches including single throw, double throw (manual transfer), fused and non-fused as well as enclosed circuit breakers.

SERVICE CONNECTION CABINETS

Allows for easy terminations of service conductors before utility pad mount transformer is installed. Available with and without utility CT metering provisions.

COMBINATION MAIN(S) WITH UTILITY METERING

Compact, competitively priced and readily available combination main (MCT) or six disconnect rule panel (SCT) with utility metering provision.

PROJECT SPECIFIC ENGINEERED PRODUCTS

SWITCHBOARD / PANELBOARDS / M-SUBS

Standard and custom engineered switchboard assemblies with numerous modifications available including integrating equipment such as transfer switches, transformers and panelboards into the equipment.

MULTI TENANT METER CENTERS

Metering solutions available for both commercial and residential applications. Features available include twelve meter sockets per section, electric sub-metering systems, and field interchangeable tenant metering kits.

BUSWAY

Quick to market, lightweight and easy to install busway system with unique feature of a direct bus T-Tap connection to AMP M-Subs, meter centers and switchboards.

MEDIUM VOLTAGE SWITCHGEAR/ SUBSTATIONS

Work with AMP to custom engineer medium voltage switchgear or unit substation to exact job requirements.

CUSTOM PRODUCTS

SHOW POWER PANELS/AV EQUIPMENT

Safe and reliable means of providing power connections for broadcast truck and company stage/sound equipment through common lug and cam type connectors. AMP products are utilized on most arenas and stadiums in the US.

MARINE/RV SUBSTATIONS

Designed with a stainless steel base and 5052 Aluminum housing all powder coated to withstand the marina environment. Also available in a powder coated steel enclosure for RV Park applications. Various other options are available.

HIGHWAY/STREET LIGHTING CABINETS

Pad mounted, weather proof enclosures consisting of utility metering with timed/sensor based lighting control and distribution.

TEMPORARY POWER SERVICE EQUIPMENT

Welded or bolted frame construction 600V, 1PH or 3PH, open or totally enclosed, indoor or outdoor, wheels or stands. Custom designed for every application.
