GTC (GENERATOR TERMINATION CABINET)

Below is a picture of one of our newest web page products, the GTC. This came about because we had a customer that had a portable generator with cam locks and wanted to be able to hardwire the load side to one of his building's manual transfer switches. With our GTC he can now just throw his switch, plug his generator in and has power restored in minutes.

Here is AMP's technical data for the GTC:

- Ratings are 400-3000A, 600V, 3 phase 4 wire, 3 phase 3 wire and 1 phase 3 wire, NEMA 1/3R dual rated and Isc ratings of 85KA RMS symmetrical with no cable lashing required. (Please contact factory for higher ratings)
- Cabinets are either wall mount or free standing and suitable for indoor or outdoor applications.
- ETL listed and labeled to UL Standards 1773 termination Cabinets.
- Cabinets meet all NEMA and NEC code standards.
- Cabinets provided with electrical grade plated Aluminum or optional plated Copper bus bars.

For more details and variations, please visit our web site at ampmfg.com and click on GTC.
